

SILVER BULL YOU'LL LOVE IT ON THE MOVE

THE UNIVERSAL KIT FOR YOUR VEHICLE UPFITTING.

SILVER BULL THE REVOLUTIONARY KIT FOR COMMERCIAL VEHICLE UPFITTING

Developed as a solution to increase productivity and protect profit margin, Silver Bull is the universal kit that redefines the standards of 3.5-ton commercial vehicle upfitting. With Silver Bull, assembly is quick, reducing installation time by up to 70%. All components are supplied ready-to-size, eliminating the need for welding, painting, and lengthy training processes for specialised personnel.

A solution designed to enhance workshop competitiveness through a significant reduction in processing costs, thanks to a system protected by international patents: outstanding quality and safety guaranteed by RECO.

MAINTENANCE-FRIENDLY

**UP TO 70%
REDUCTION IN
ASSEMBLY TIME**

**UNIVERSAL KIT FOR
3.5-TON COMMERCIAL
VEHICLES**

**SINGLE-SOURCE
SUPPLIER**

**RECO QUALITY
GUARANTEED – ISO/TS
16949 CERTIFIED**

**NO WELDING
REQUIRED**

**ECO-FRIENDLY
– NO PAINTING
REQUIRED**

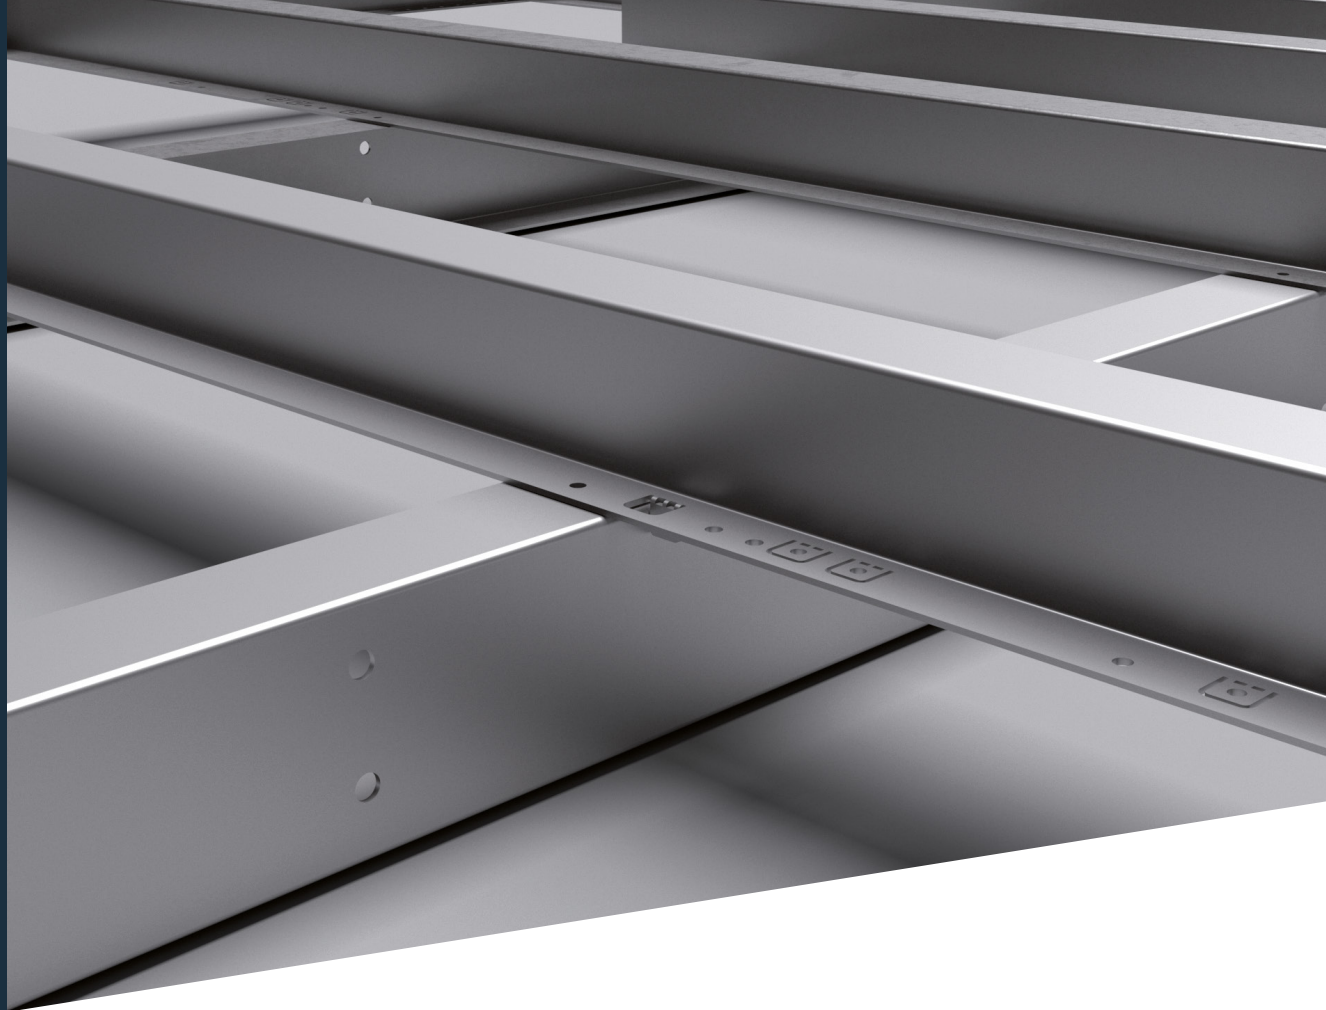

**NO LEFTOVER
STOCK**

SILVER BULL, A SUCCESS BUILT PIECE BY PIECE

MATERIAL

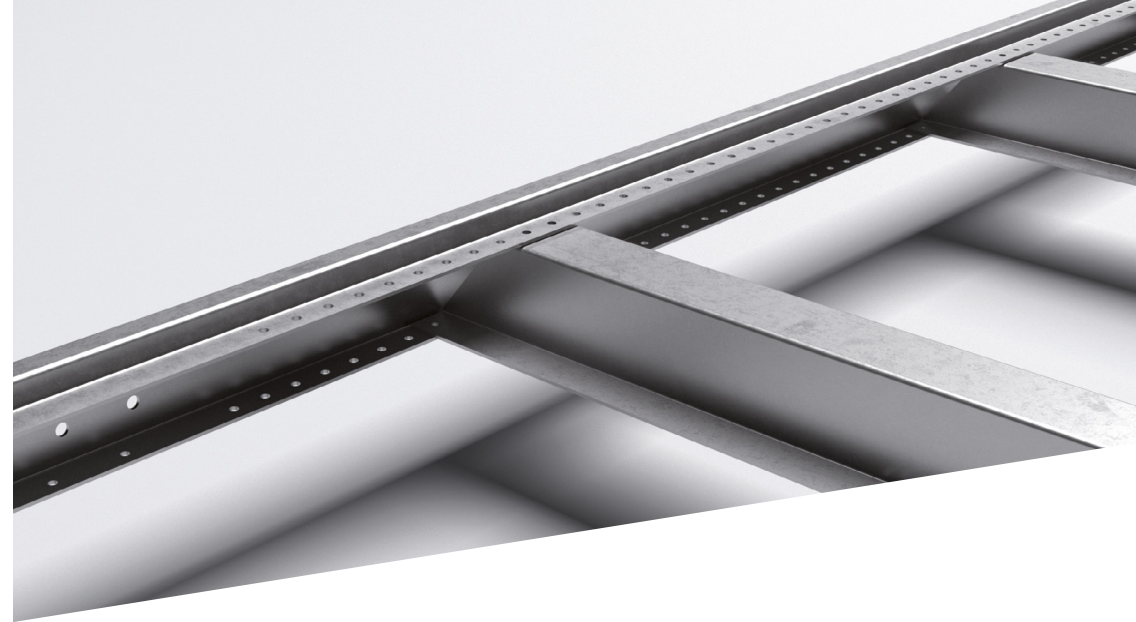

made of Magnelis® a high-strength steel featuring an innovative high-level automotive finish. Thanks to its specific composition with a high magnesium content, it offers outstanding durability and corrosion resistance, with performance exceeding

1,440 hours in salt spray testing. Unlike standard steel, it does not require additional surface treatments, ensuring faster and more cost-effective installation. Magnelis® is also self-healing, helping prevent the onset of oxidation.

ASSEMBLY

Silver Bull is designed for simple, fast and cost-effective installation: "no skills, no tools." The kit includes all semi-finished, ready-to-size and pre-drilled components, with no welding or painting required. Maintenance is efficient and streamlined thanks to easy system integration and the Magnelis® S355 steel construction.

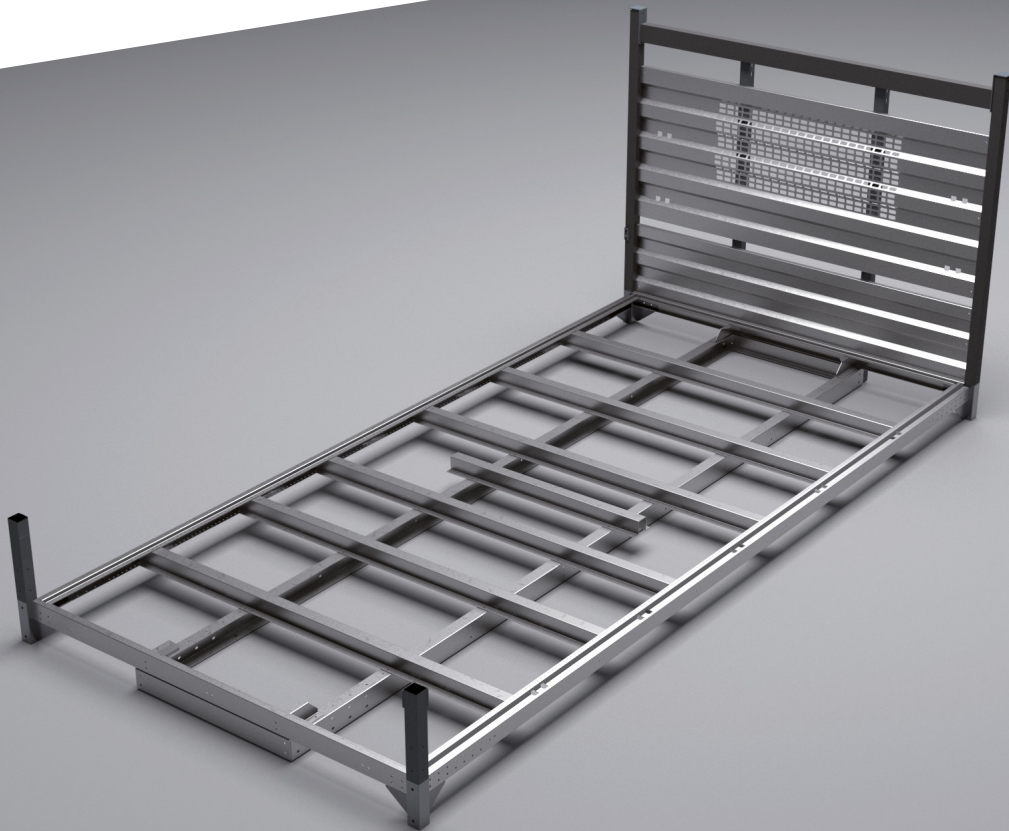

SIZE AND UNIVERSALITY

The system is modular and designed to adapt to different vehicle dimensions. Cross beams and longitudinal beams are pre-drilled, ensuring fast and efficient assembly of the structure.

EFFICIENCY

The patented self-centring cross-beam system ensures fast and precise installation. The process does not require expensive equipment, and the installation is simple and quick. The Silver Bull kit includes everything required for installation, with rivets and bolts supplied in Geomet-coated or stainless steel. With a single order from a single supplier, the kit helps eliminate production waste and inventory management issues.

FOR YOU, WE GO FOUR TIMES FURTHER

SILVER BULL CLASSIC

All the load capacity you need, exactly where you need it.

SILVER BULL OPEN

No barriers to your load.

SILVER BULL SIMPLY

Lightweight and versatile.

SILVER BULL FULL

With doors or side boards: complete and ergonomic.

CLASSIC

ALL THE LOAD CAPACITY YOU NEED, EXACTLY WHERE YOU NEED IT

REAR SUPPORT RACK

The steel rear support rack, designed to support more than 500kg, features a cataphoretic coating and powder coating finish, ensuring maximum strength and outstanding resistance to weathering.

PREMIUM CAB GUARD

Made of Magnelis® steel, robust and elegant.

LIGHT CAB GUARD

Made of aluminium alloy, both lightweight and efficient

SIDE BOARDS

Completing the kit, the custom-sized anodised aluminium side boards come fully equipped with hinges and aluminium locking systems.

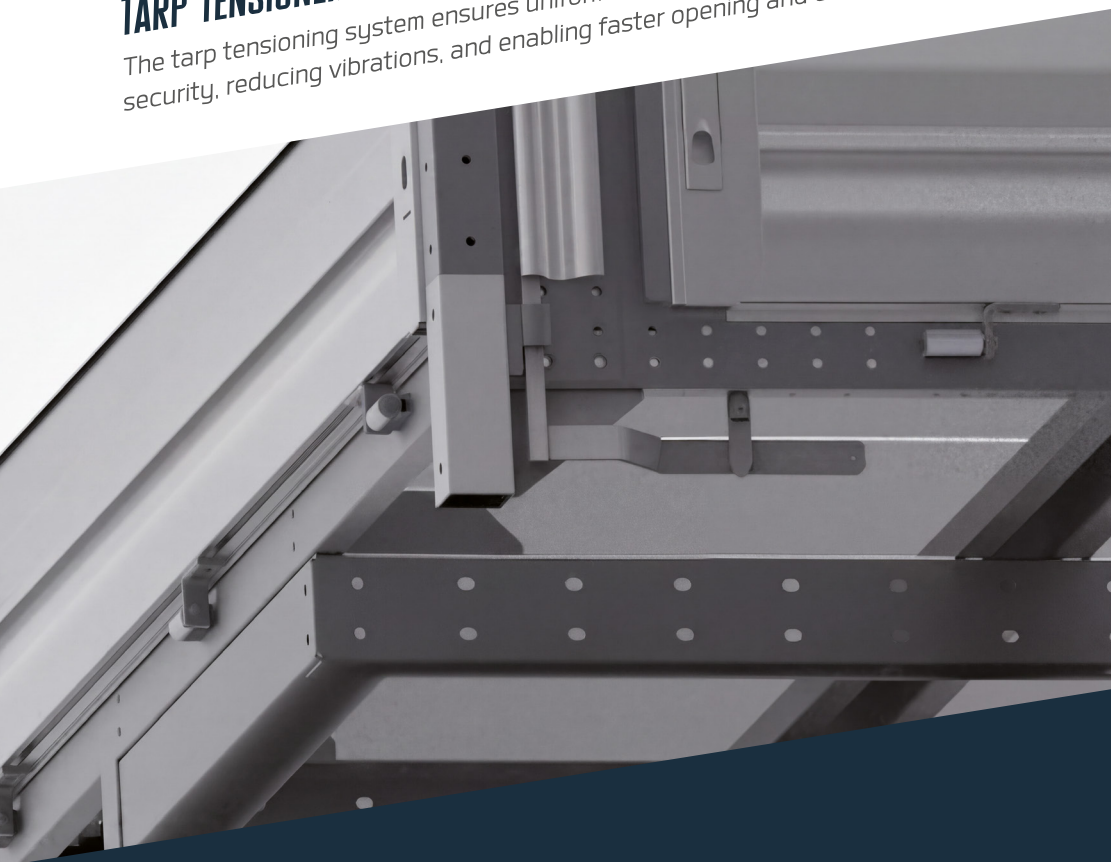

OPEN
NO BARRIERS TO YOUR LOAD

SIMPLY

LIGHTWEIGHT AND VERSATILE

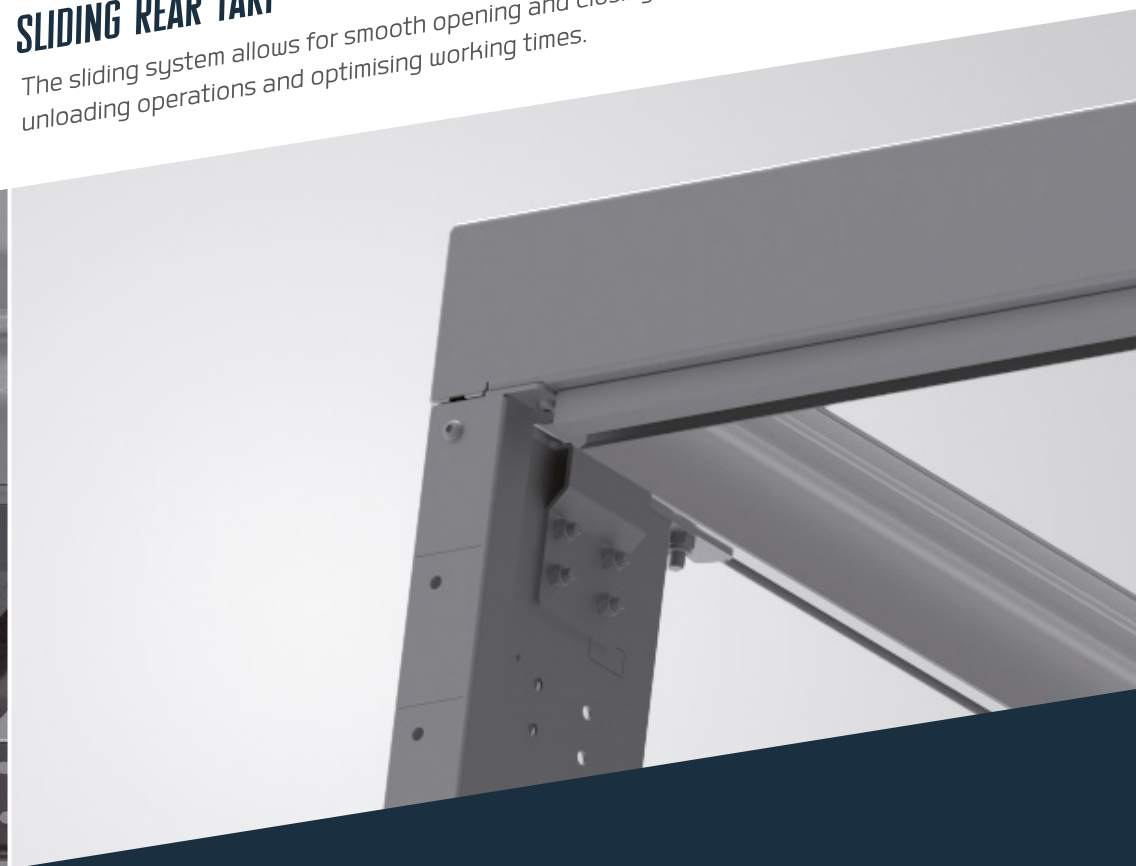

TARP TENSIONER

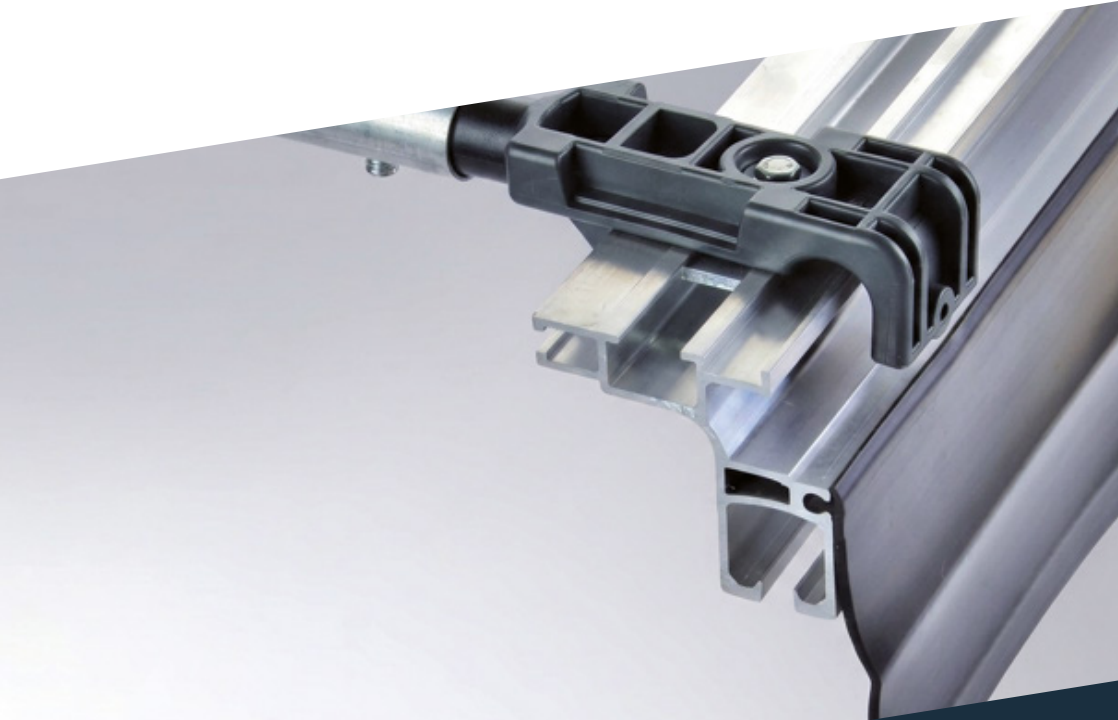

The tarp tensioning system ensures uniform tension across the cover, improving load security, reducing vibrations, and enabling faster opening and closing operations.

SLIDING REAR TARP

The sliding system allows for smooth opening and closing, speeding up loading and unloading operations and optimising working times.

EVEREST ROOF

Available in a fixed version for a solid and durable structure, or in a sliding version to facilitate top-loading operations. The ideal solution to meet every operational requirement without compromising safety.

REAR DOOR AS AN ALTERNATIVE TO THE SIDE BOARD

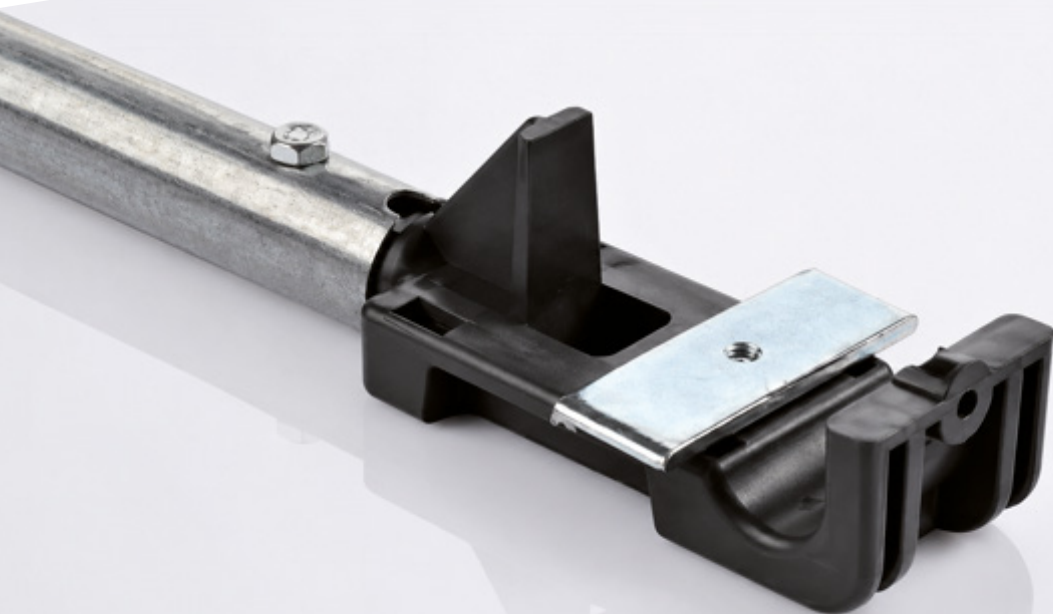

The rigid rear door provides a robust alternative to the tarp, offering greater impact resistance, enhanced protection against weather conditions, and improved load protection. Ideal for those seeking long-term strength and reliability.

FULL
COMPLETE AND ERGONOMIC

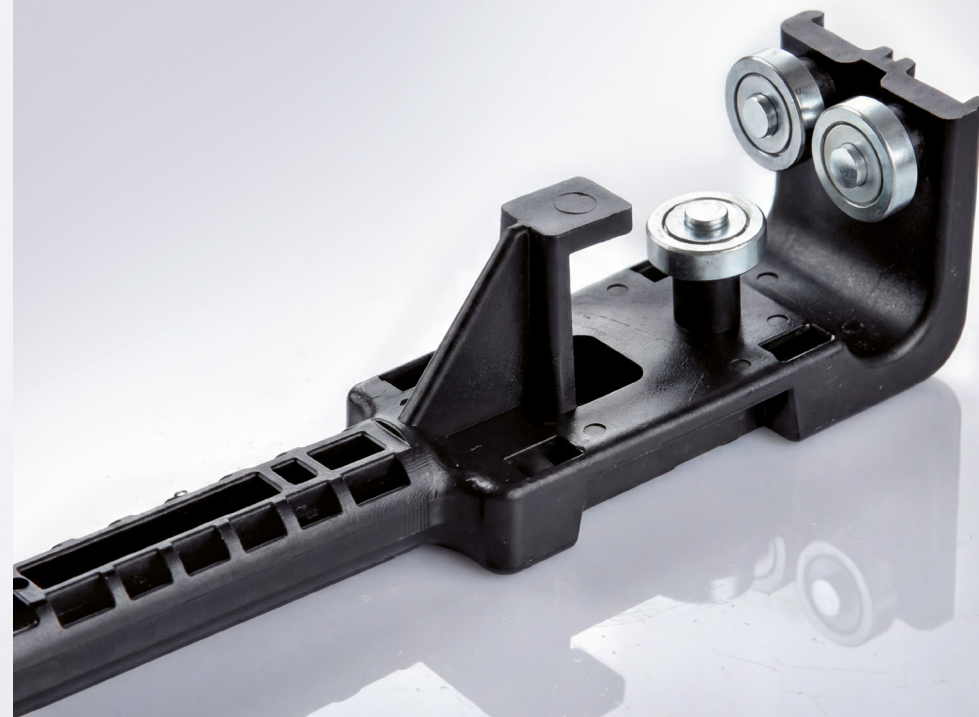

FIXED ROOF

The fixed yet flexible roof features an adjustable bow designed to adapt to any vehicle width, with thermoplastic resin end caps that ensure maximum resistance to fatigue and torsional stress.

SLIDING ROOF

The technological innovation behind the EVEREST S sliding roof is revolutionary in both design and functionality, addressing at its core the need for rapid roof opening operations on commercial vehicles.

ACCESSORIES THAT MAKE THE DIFFERENCE

STORAGE BOXES

An elegant and functional component, the storage boxes are made from impact-resistant and weather-resistant materials, providing secure space for tools and work equipment. More organisation, more efficiency every day.

LOAD RESTRAINT SYSTEM

A type-approved system designed to secure the load during transport, minimising movement, impacts and the risk of damage. Safety for everyone on the road.

LIGHTING

Type-approved lighting systems designed to ensure maximum road safety. Reliability, durability and outstanding aesthetics.

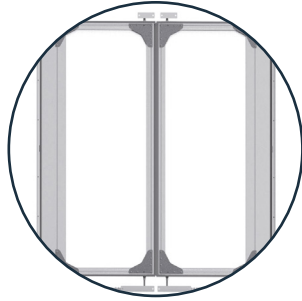

The door fitted on the Full model can be chosen as an alternative to the hydraulic tail lift and is also available for separate purchase.

SILVER GATE DOOR

Suitable for any vehicle size, it features a highly robust anodised aluminium structure with optimised weight. The Silver Gate door can be configured with different types of composite panels to meet the customer's aesthetic and functional requirements. It is quick to install and is also available as a kit solution.

ANODISED ALUMINIUM STRUCTURE
